1. INTRODUCTION

DOSSIER-Cloud’s website was created using the web CMS software Wordpress (https://wordpress.org/) and it is hosted on the web servers of the Cyprus University of Technology.

The website may be accessed using the following link: http://www.dossier-cloud.eu.

The rationale based on which the website was built is to offer a simple and easy-to-use environment for disseminating information about the project, its objectives, progress and main results. Also, the website is expected to become the main link between the partners and industrial stakeholders that wish to be actively involved in the project on a voluntarily basis and participate in certain activities like workshops, information events and summer schools.

The rest of the document describes briefly the main screens/sections of the website.
2. **HOMEPAGE**

The Homepage of the project’s website provides a top menu with links to the different sections and the project’s logo (see fig1. 1 and 2). The main area contains the project’s full title and specific thematic area of H2020, along with the logos of the partners and the EC. Below this, a brief description about the project is given.

![Figure 1 – Homepage](#)

![Figure 2 – Homepage (continued)](#)
3. DESCRIPTION SECTION

The section “Description” provides more information about the project, particularly details concerning its mission, so that visitors can read and understand what this project is all about (see fig. 3).
4. **CONSORTIUM SECTION**

The section “Consortium” presents the partners who will participate in DOSSIER-Cloud (see fig. 4). By clicking on one of the partner’s logo, the visitor is redirected to a description of the partner’s profile, its role in the project and a link to that partner’s official website (see fig. 5).

5. STAKEHOLDERS SECTION

The section “Stakeholders” presents information about the different stakeholders that currently participate in the project in cooperation with the project’s partners in each country (see fig. 6). Currently, only a limited number of stakeholders who have already expressed their interest to voluntarily participate in the project from Cyprus are displayed. As the project progresses, it is anticipated that many more stakeholders will join once dissemination activities are performed in each country. By clicking on a participating country’s flag, the visitor is redirected to a separate page where he/she can get more information about the stakeholders in that particular country (see fig. 7).

6. WORK PACKAGES SECTION

The “Work Packages” section provides the title and description of each Work Package (WP) so that visitors to the website are able to understand the main targets of each WP and the main activities that take place (see figs 9 and 10).
7. OBJECTIVES SECTION

The “Objectives” section links each WP with detailed descriptions of specific objectives of DOSSIER-Cloud.

**Figure 11 – Objectives Section (continued)**
8. DELIVERABLES SECTION

The “Deliverables” section shows a table with information about the deliverables of the project. The table includes the identifier, the description, and type and the dissemination level of each deliverable. Also, the table indicates whether or not the deliverable has been completed yet. The list will be continuously updated as regards progress of delivery of the documents.

9. **DISSEMINATION SECTION**

The “Dissemination” section is divided into several categories (see figs. 14 and 15). By clicking on a category the visitor is redirected to separate pages where the dissemination material for that specific category can be browsed and downloaded.
10. NEWS SECTION

The “News” section presents any new posts and announcements on behalf of the project’s partners (see fig. 16).

Figure 16 – News Section
11. CONTACT US SECTION

The “Contact Us” section, which is the last section of DOSSIER-Cloud’s website, provides all the necessary information for the interested user to contact the coordinators of the project. The information includes the address, phone number, e-mail, various links and the location of the Coordinator’s premises. There is also a “contact us” form so that visitors can fill in their information and contact the project coordinator directly (see fig. 18).

12. FOOTER AREA

This footer area of the website shows the partners’ logos, as well the EC and Horizon 2020 logos (see fig. 19). Also in this area, a visitor is able to find the project’s official Facebook and Twitter page widgets, as well as a search engine to find specific information in the website using keywords.
