

Welcome

Towards the establishment of new links and collaborations among participants, this event is an opportunity to bring together researchers, technicians, students and other professionals to present their latest findings and discuss their current work, state-of-the-art and future perspectives for the basic and applied aspects in Soilless Culture and Circular Horticulture. We hope the online meeting will promote the exchange of ideas and international cooperation and collaboration among researchers. The congress will be comprised of plenary and ordinary sessions, workshops and poster display sessions that are expected to provide new knowledge and promote scientific dialogues during the conference.

The main conference topics are

- (1) Circular Soilless Culture-hydroponics/Saving resources/Recycling resources
- (2) Conversion to Closed Systems
- (3) Aquaponics, phytotronics and bioaponics based systems
- (4) Quality and nutritional aspects of soilless grown products for the consumers
- (5) Organic hydroponics.

The Symposium will be held on line though an interactive conference platform, from 19th to 22nd of March 2021.

We look forward to seeing you all during the next Hydro2020 symposium.

The conveners

Nikolaos Tzortzakis, Cyprus University of Technology

Silvana Nicola, University of Turin
